

## FLY SKYPARK – LODGING INFORMATION & EXPECTATIONS

Arrival Date: \_\_\_\_\_ Expected Departure Date: \_\_\_\_\_

Student Name: \_\_\_\_\_

Welcome to Skypark. For students traveling from out of town, we offer simple on site lodging to make training more efficient and convenient. The guidelines below outline how the space is used so we can maintain a clean, respectful, and training-focused environment for everyone.

### 1. Purpose of Lodging

Skypark lodging is designed for short stays that support your flight training. It is not intended as long-term housing or a residential arrangement.

### 2. How the Space Should Be Used

To keep the lodging available and comfortable for all students, we ask that it be used in a practical, travel-style manner.

Please avoid activities that suggest long-term living, such as hosting guests, or using the address for personal or official records.

### 3. Training Activity

Because the lodging is meant to support progress in training, students staying on-site should generally plan to fly around three (3) times per week, weather permitting.

If weather or operations slow things down, just communicate with us so we can stay aligned.

### 4. Lodging Fee

The lodging rate is \$10 per day for each day you stay on-site.

### 5. Respect for the Space

We expect all students to maintain basic cleanliness, handle the space with care, and be considerate of others using Skypark facilities.

Report anything that needs attention so we can address it quickly.

### 6. Changes in Training or Lodging

If training pauses, slows significantly, or shifts direction, lodging access may discontinue. This ensures the space remains available for active students who need it. We handle these situations professionally and with clarity.

## 7. Personal Belongings

Students are responsible for their own valuables and personal items while staying at Skypark.

### Acknowledgment

I understand and agree to the expectations for using Skypark lodging during my training.
